

Investigating Place

PLACE

What is a place? What makes it distinct? What meaning does it have? Who for? Where is this place? Who uses this place? What goes on here? How am I connected to this place? What are the local to global connections? How is it linked to other places nearby and in the wider world? How is its location significant? Why and how is this place changing? How do I feel about this place? How do others feel about it? Who owns it? How does this place change when I 'zoom in' or 'zoom out'? What is it like to live here? What other 'stories' about this place are there? What will this place be like in the future? What's it got to do with me? Why should I care?
