Cutting-edge A-level geography series launched

Top Spec Geography is the Geographical Association's brand-new series of books for A-level geography students. These cutting edge resources are designed to help students investigate specialist topics from AS/A2 and to bridge the gap between A-level and university. The authors have been selected to combine the expertise of professional researchers in universities with the experience of classroom teachers to ensure the books present the latest information in an accessible and stimulating way.

The first two titles are:

- ***Health Issues in Geography*** by Bob Digby and Dan Cowling. This title explores how geography adds to the study of health and considers the links between the two including patterns of environmental and behavioural diseases, contrasting health care approaches from around the world and disparities in access to health care. ISBN: 978-1-84377-252-1.
- ***Emerging Superpowers: India and China*** by Gill Miller and Sue Warn. This book traces the emergence of China and India as the superpowers of the future, helping students understand the challenges facing both nations as they race to develop in the twenty-first century. ISBN: 978-1-84377-253-8

Forthcoming titles in the series are: *Flood Risk and Management*, *Climate Change and the Arctic*, *HIV/AIDS as a Development Issue*, *Tectonic Hazards*, *Changing Populations in New Europe*, *Energy Questions* and *London 2012: Economic curse or lasting legacy?*

Each title is priced at £14.99 (GA members), £19.99 (non-members) and is available to buy from the GA's online Shop (www.geography.org.uk/shop) or by calling 0114 296 0088.

To request review copies please contact Nicola Donkin (ndonkin@geography.org.uk).

Notes to Editors

Book covers are available upon request.

The Geographical Association

The Geographical Association (GA) is a subject association with a mission to further the teaching of geography and to communicate the value of learning geography for all. The GA was founded in 1893 and has around 6,000 memberships including teachers in primary and secondary schools and further education, academic geographers, universities and teacher educators and trainers.
