

## Where will I live?

1. Underneath the method write a sub title: **Results.**
2. Study the secondary data comparing Colne, Pendle to the Whalley, Ribble Valley.
3. Draw a pictogram comparing the average house price for all the properties in both areas. For the scale you could use 1 small house = £50,000. In the results section.
4. Write the sub title **Analysis of results.**
5. In this section you have to compare the data. What differences are there? Similarities? What are the reasons for this? You need to write around half a side of A4. You must explain the results from your environmental survey.
6. Write the sub title **Conclusion.**
7. In this section you have to accept or reject the hypothesis:  
“ The better the environmental quality of an area the higher the house price”  
You need to give a brief overview of what you have found out during this investigation.
8. Write the sub title **Evaluation.** In this section you need to explain the investigation could have been improved. E.g. change to the environmental survey?
